Sealed Lead Batteries

Sealed Lead Batteries (Rechargeable)

Rechargeable batteries are lead-lead dioxide systems. The dilute sulfuric acid electrolyte is absorbed by separators and plates and thus immobilised. Should the battery be accidentally overcharged producing hydrogen and oxygen, special one-way valves allow the gases to escape thus avoiding excessive pressure build-up. Otherwise, the battery is completely sealed and therefore maintenance-free, leak proof and usable in any position.

- Stable quality and high reliability
- Sealed construction
- Long services life, float or cyclic
- Maintenance-free operation
- Low pressure venting system
- Heavy duty grids
- Low self discharge
- UL component recognition

Uninterrupted Power Supplies

PRO060
(front & back shown)

MGE ELASR1500T
(front of 2 units shown)

PRO060 & MGE ELASR1500T UPS - Uninterrupted Power Supplies

Ellipse ASR UPSs not only provide a battery backed up supply to keep equipment operating when there is a power cut but also provide effective protection against damaging surges. Ellipse ASR (Advanced Surge Reduction) UPSs include a high performance surge protective device which complies with IEC 616431. Ellipse ASR UPSs also protect telephone, broadband and Ethernet 10/100 MB for complete protection.

Applications:

- PC's
- Workstations
- Printers
- Cameras
- DVR's and POS.

MGE ELASR1500T:

- Replaceable batteries
- Circuit breaker reset button
- Combined USB / serial port
- Sockets with surge protection and backup
- Tel/broadband and Ethernet 10/100 MB protection
- Supplied with USB and serial port cables
- 19" rack mounted
- Vertical box format or below the desk
