BOLLARD01
BOLLARD01YELLOW

Bollard01 Sprint Goose Neck Bollard (black & Yellow)

The Sprint bollards are specifically made for entry and exit access control situations. The unit is made from mild steel and is perfect for installation on entry and exit applications such as automatic gates, car parks, caravan parks serviced apartments and security complexes. The bollards are made out mild steel and are powder coated for longevity in either black or yellow. The front plate will easily fit keypad, proximity reader, keyswitch or surface mount audio / video intercom. For ease of installation the bollards come with pre-drilled holes in the front plate and bottom for cable entry and exit, and 4 holes in the bottom plated for securing of the unit with dyna-bolts.

* **Note:** Custom sizes shapes and colours are available on request with price and delivery time subject to the request.
