CYT-PROT/DATA

Cyturion Range of GSM Products

Australian designed, manufactured and tested to meet the exacting standards of business, government and domestic users. The Cyturion range of GSM products features several models - Cyturion Protector (GSM backup), Cyturion Pro-Data (backup plus GSM data transmission) and the all new Cyturion 3G Protector and 3G Pro-Data.

All models feature an integrated SMS/GSM engine, enabling alarm data to be sent over the GSM network. Keen focus has been placed on state-of-the-art microprocessor design, enabling a range of power management features. Designed for use in fixed locations and configured for 240VAC operation, the Cyturion GSM range incorporates an on-board regulated power supply, dynamic battery testing and battery charger. Cyturion models may be programmed via laptop or by simple SMS commands from any GSM/ 2G/ 3G phone and have been designed to operate on all 900/ 1800MHz GSM networks. New 3G models support the 3G spectrum.

Note: All models are supplied in metal case as per the above image.
