

- Custom designed crossover & speaker combination.
- Easy 'flip-lock' installation.
- Architecturally unobtrusive.
- 'Eyeball' adjustable tweeter mount.
- Aluminium powdercoated grille.

C 0883 200mm (8") Round 2-Way Ceiling Speaker

Ideal for multi-channel or stereo use in high end domestic AV systems.

Suitable for wall or ceiling mounting, these low profile attractive speakers will complement a wide range of hi-fi and A/V sound systems. In addition, they can be utilised in outdoor or marine environments as the grilles are constructed from aluminium mesh. They can provide a new dimension to home theatre systems when used as surround speakers, or provide incredible hi-fi sound as a full-range system with very little visual room intrusion. The efficient polycone drivers produce clear bass and midband response, while the dome tweeters provide crisp clean high frequencies. The adjustable dome tweeter is "eyeball" mounted, enabling the optimisation of lateral high frequency response. The speakers include two-way passive crossovers. Installation is simplified by the use of a 'flip-lock' mounting system.

Supplied with marine grade aluminium grille painted with long lasting industrial strength powdercoat finish to withstand the harshest of environments. Suitable for sheltered outdoor, marine and tropical applications.

Specifications	
Impedance:	8Ω
Rated power:	40W RMS
Max power:	100W
SPL 1W @ 1m:	90dB
Freq response:	40Hz - 20kHz
Weight:	1.8kg each
Mounting hole (mm):	242Ø
Dimensions (mm):	273Ø x 101D approx.
Sold in pairs.
