Close-up view.

Details that make the difference.

Profile.

Ultra-thin: the main body of TAB is just 2.5 cm thick. And thanks to the fixing bracket, it is easily applied to the wall.

4,3"

Colour display.

Visual performance in a 4.3" display offering high definition, colour images of the outside.

Appearance.

TAB is available in white or black: both versions are finished with a special glossy effect typical of today's ultra-modern technology.

Capacitive keyboard.

TAB is the first monitor to have buttons and controls flush with the surface. There is no extra bulk, in line with the minimal design of the appliance as a whole. 8 functions, 4 of which are standard and 4 programmable for intercom calls or auxiliary services.

Accessibility.

TAB has an internal coil which allows hearing aid wearers to use the device. Plus, the keyboard is back-lit: each icon lights up if the corresponding function is activated.

Ringtones.

There are 10 different pre-set melodies in the TAB device memory: simply select your favourite and adjust the volume according to your requirements and the application contexts.

TAB series surface mounting video entryphone

Monitor made of thermoplastic material with handset and 4.3" LCD colour display. Equipped with keypad for the video door entry functions: talk/listen, door lock release, self-start, auxiliary services (stair lighting), ringtone muting and 4 programmable additional buttons that can execute up to 4 auxiliary functions or intercommunicating calls.

It is possible to control brightness, ringtone volume, ringtone muting when "User Away" function is activated and ringtone type selection. Facility of selecting different ringtones for calls made from different points, e.g.: external entrance panel, landing call, intercom call.

Signalling of "Door/gate open" and "Unanswered calls" (up to 4 calls with monitor in ringtone muted mode).

The monitor features a hearing aid function as standard.

Conformity to Standards
EMC directive
