

RECEIVERS : ENCRYPTED RADIO RANGE

OUR RECEIVERS RANGE IN 433.920 MHZ

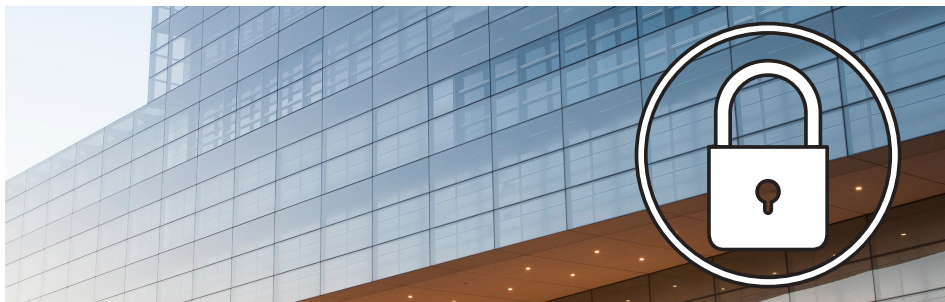

CHANGES

The receivers of our range are **now available in the encrypted version.**

Installed together with **our SLIM+ transmitter**, your site will be highly protected (AES 128 encryption).

 **PLEASE NOTE!**

The receivers can **still work together with the Rolling-Code transmitters** as PRASTEL TC4E / SLIM4E. The encryption will be active if the 1st inserted transmitter is the SLIM+.

AVAILABLE RECEIVERS

- ▶ 1,2 or 4 channels
- ▶ 12/24 Vac/dc

SLIM+

Offers a new technology which allows **an encrypted and copy-proof transmission**. A very **high security transmitter** with an **AES128 algorithm** (used in the documents classified as a military secret by the NSA).
