Prox Rex — Access Control Exit Device

PROXIMITY REQUEST TO EXIT SWITCH

The Prox Rex is a touch sensitive wall switch, which can be used for a number of applications:

- Used in conjunction with an Access Control System to perform the function of an exit button
- Used as a remote door release switch at a reception desk etc.
- Used as a panic button that gives the user audiovisual feedback that it has been operated.
- Used to enable easy operation by the disabled.

FEATURES

The Prox Rex unit has the following features:

- No moving parts to wear out and fail.
- 12 to 16 Vdc operation.
- Only draws 50 mA at 13.6 Vdc.
- Relay output to the Access Controller, 1 Amp DC rated N/C or N/O.

The Prox Rex exit is designed primarily to be used in conjunction with an Access Control System Reader to exit a door.

Em Rex — Emergency Exit Device

EMERGENCY REQUEST TO EXIT SWITCH

The Em Rex is an emergency door release unit, which is used in conjunction with the Prox Rex touch to exit unit to make up a total access control exit unit.

- Used in an Access Control System to work in conjunction with an exit button to give emergency egress to comply with building codes;

FEATURES

- Has 3x N/C-N/O outputs 1 amp DC rated;
- 1st output to the Access Controller to log the operation of the unit;
- 2nd output to break lock power directly;
- 3rd output to activate a local audio sounder (if required);
- A red indication bar also shows when the unit has been activated.

MOUNTING

- Fits into a standard single flush box.
- Surface mounted with optional deep surround.
- Fits next to the Prox Rex on an optional special Double Flush Box (not standard) and double surround.
