

## EHME12R - E100/E200 Housing Mount

### Measurements & Weight:

L: 380mm

W: 152mm

H: 166mm

Weight: 2.50kg

### Suitable for :

E100CPM/MCU, E100CPM/SU

E200CPM/MCU, E200CPM/SU

In situations where concealed installation is not feasible, our hardware comes with special housing mounts that enables a surface-mounted type of installation.

The upper side of the enclosure housing mount is equipped with screw opening for suspended installation, as well as cable entry points - intended for cases where the ceiling height significantly exceeds the prescribed standard and the system needs to be lowered.

On the rear side, the enclosure housing mount has dedicated opening for wall mounting, using a housing mount extender which is also available among our optional accessories.

Installation of this housing mount is completed within just a few minutes.

The installation of the CPM system is identical to that of the in-ceiling version, with the only difference being that, instead of placing the unit into the ceiling, it is mounted into the housing mount enclosure - which is pre-installed on to the ceiling.
