

ICP-SOL-ENC Steel enclosure, solution, white

The enclosure is for residential burglary installations and commercial burglary applications.

The enclosure is compatible with multiple enclosure tamper switches and can hold up to two batteries.

The enclosure has cable entry points in multiple locations with cable management points. There are numerous punch-outs around the enclosure for easy cable or antenna routing.

System overview

The enclosure can house Solution 2000 / 3000 / 6000 control panels and modules.

The enclosure has the ability to mount one Solution 2000/3000 PCB and up to six SDI2 modules, plus one X WE800EV2 receiver.

Alternatively, when using the Solution 6000 PCB the enclosure can hold two small expander modules or one CM705B Universal module.
