AIM MDU

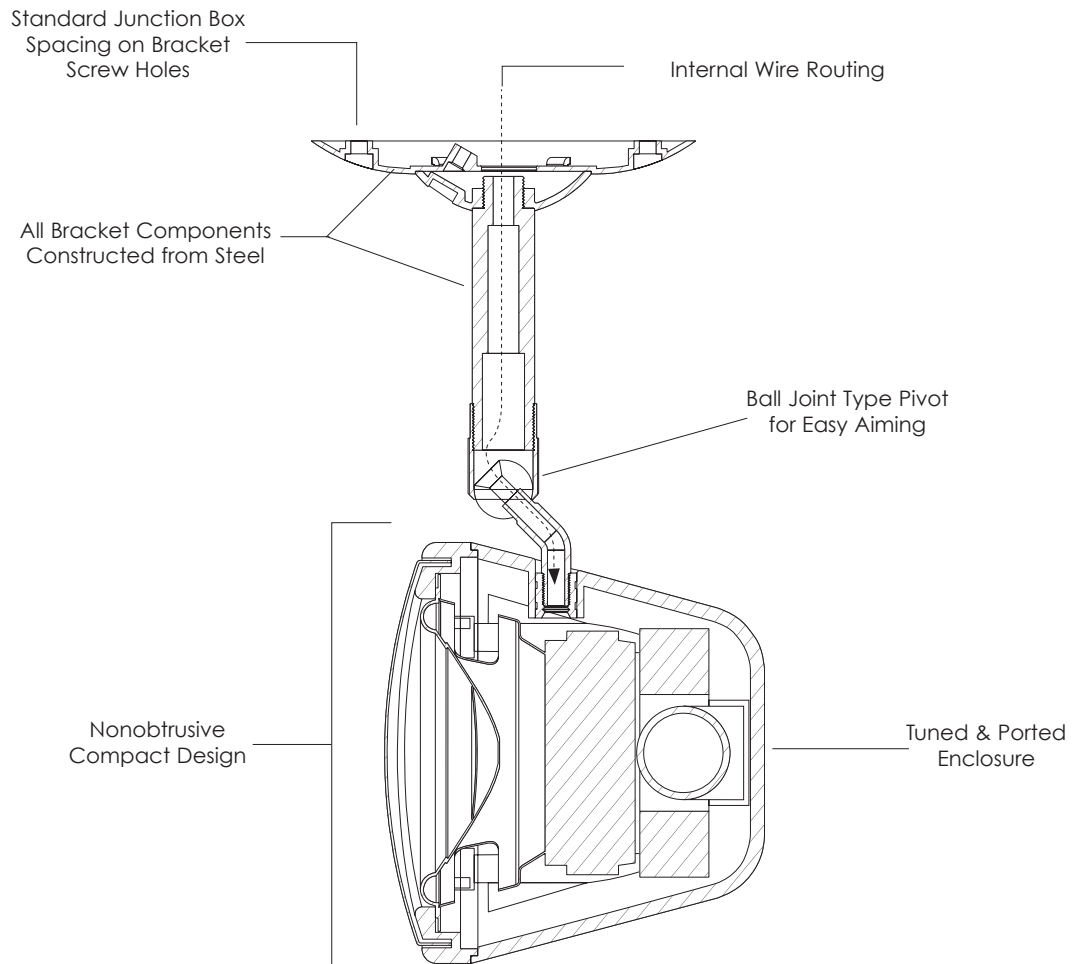

In some applications installing a speaker in the wall or ceiling is simply not feasible. Multiple Dwelling speakers or "MDU's" are a perfect solution. Whether it be the construction materials, lack of inner wall space, sound transference into an adjoining unit or code restrictions, there are simply times when a flush mounted speaker will not work.

The AIM MDU was design specifically for these applications. Mounted to a J-box or attached directly to a ceiling joist, the multi-pivot bracket suspends the ported enclosure and allows the speaker to be aimed at any position in the room. The 4-inch woofer and 1-inch dome tweeter deliver a very smooth and open sonic presentation that, matched with one of our freestanding subwoofers, will dramatically fill any room in a condo, town home or apartment with a very satisfying musical experience.

AIM MDU One

- 4" IMG Cone Woofer
- 1" Silk Dome Tweeter
- Timbre-Matched to All One Series Speakers
- Efficiency: 87dB 1W/1m
- Frequency Response: 78Hz - 20kHz \pm 3dB

* Limited LIFETIME Warranty on Speaker Components

* As we incorporate design improvements, specifications may change without notice.
