YOUR PARTNER

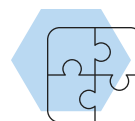

for Every Step of the Security Journey

At Aiphone, we provide cutting-edge security communication solutions that enhance safety, connectivity, and convenience. Our mission goes further: we empower everyone to see, speak, and unlock doors for those you trust, recognising that human judgment are essential to true security.

Trusted by tens of thousands of organisations around the world—including corporate campuses, schools, and government facilities—we offer the world's largest portfolio of security communication products, ranging from audio intercoms to state-of-the-art IP video intercoms.

Our solutions stand out for functionality, accessibility, and integration capabilities. No matter where you stand in your security journey, we have the expertise and technology to strengthen your communication system.

#1 TRUSTED BRAND

OVER 75 YEARS

Established in Japan in 1948 and expanding globally since 1970, we are the leading intercom manufacturer worldwide.

200K+ ORGANIZATIONS

Over 200,000 organizations made Aiphone their first choice for security and communication solutions.

3M+ DOORS

You can find our intercoms providing security and visitor screening at over 3,000,000 doors, inside and out.

150+ PRODUCTS

We offer a wide range of intercom products to meet your unique security requirements.

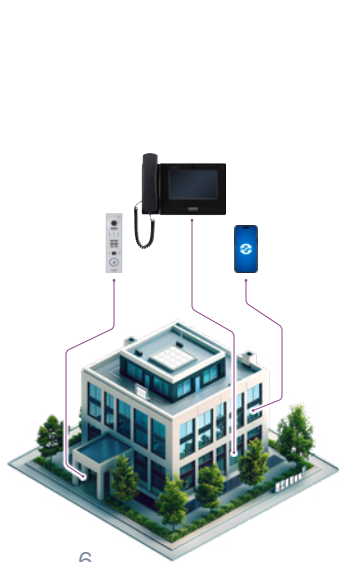

Who We Serve

WE UNDERSTAND every industry has unique SECURITY NEEDS.

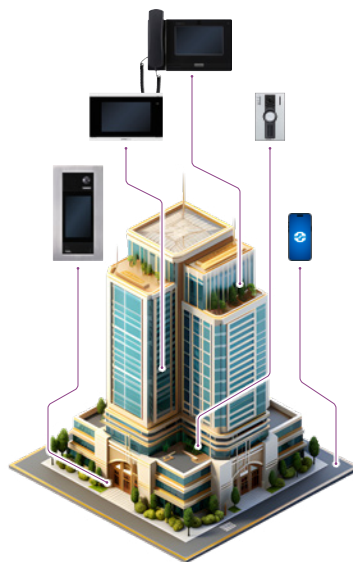

COMMERCIAL

Office buildings, retail stores, and warehouses seeking an affordable, yet reliable, video intercom solution with two-way audio communication and door release.

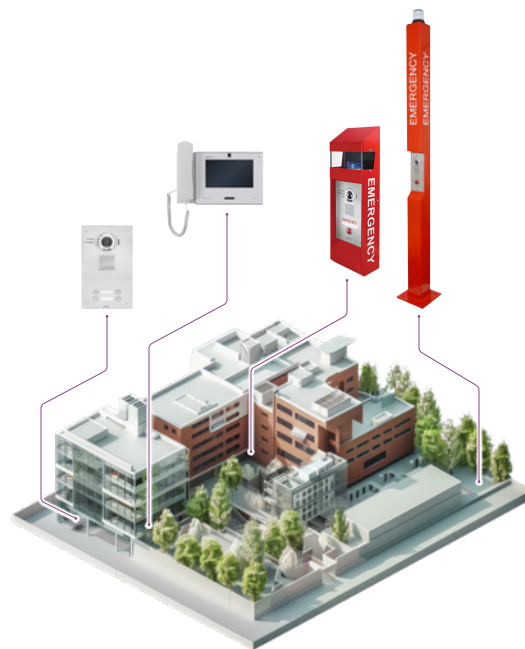

MULTI-TENANT / MIXED-USED

Gated communities, apartment complexes, and mixed-use developments seeking a solution that features a user-friendly entrance panel, easy tenant management, and a mobile app that enhances the security and end user experience for residents and tenants.

LARGE CAMPUSES

Corporate and healthcare campuses with multiple entry points and communication points seeking a highly customisable intercom solution to enhance visitor screening and management, as well as improving internal communication.

Our VERSATILE SOLUTIONS cater to organisations in a wide range of markets.

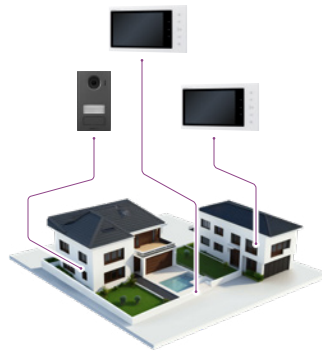

EDUCATION

Primary and secondary schools, as well as university campuses, with multiple entry points that require a unified video intercom and access control solution for identity verification, remotely unlock doors from a camera view, and other features like paging and chime scheduling for announcements and emergency broadcasts.

RESIDENTIAL

Single-family homes, townhouses, and larger homes seeking enhanced security and communication measures. Our video intercom solutions withstand harsh weather, offer uninterrupted connection, and give you the convenience of an app on mobile devices to monitor, communicate, and unlock doors.

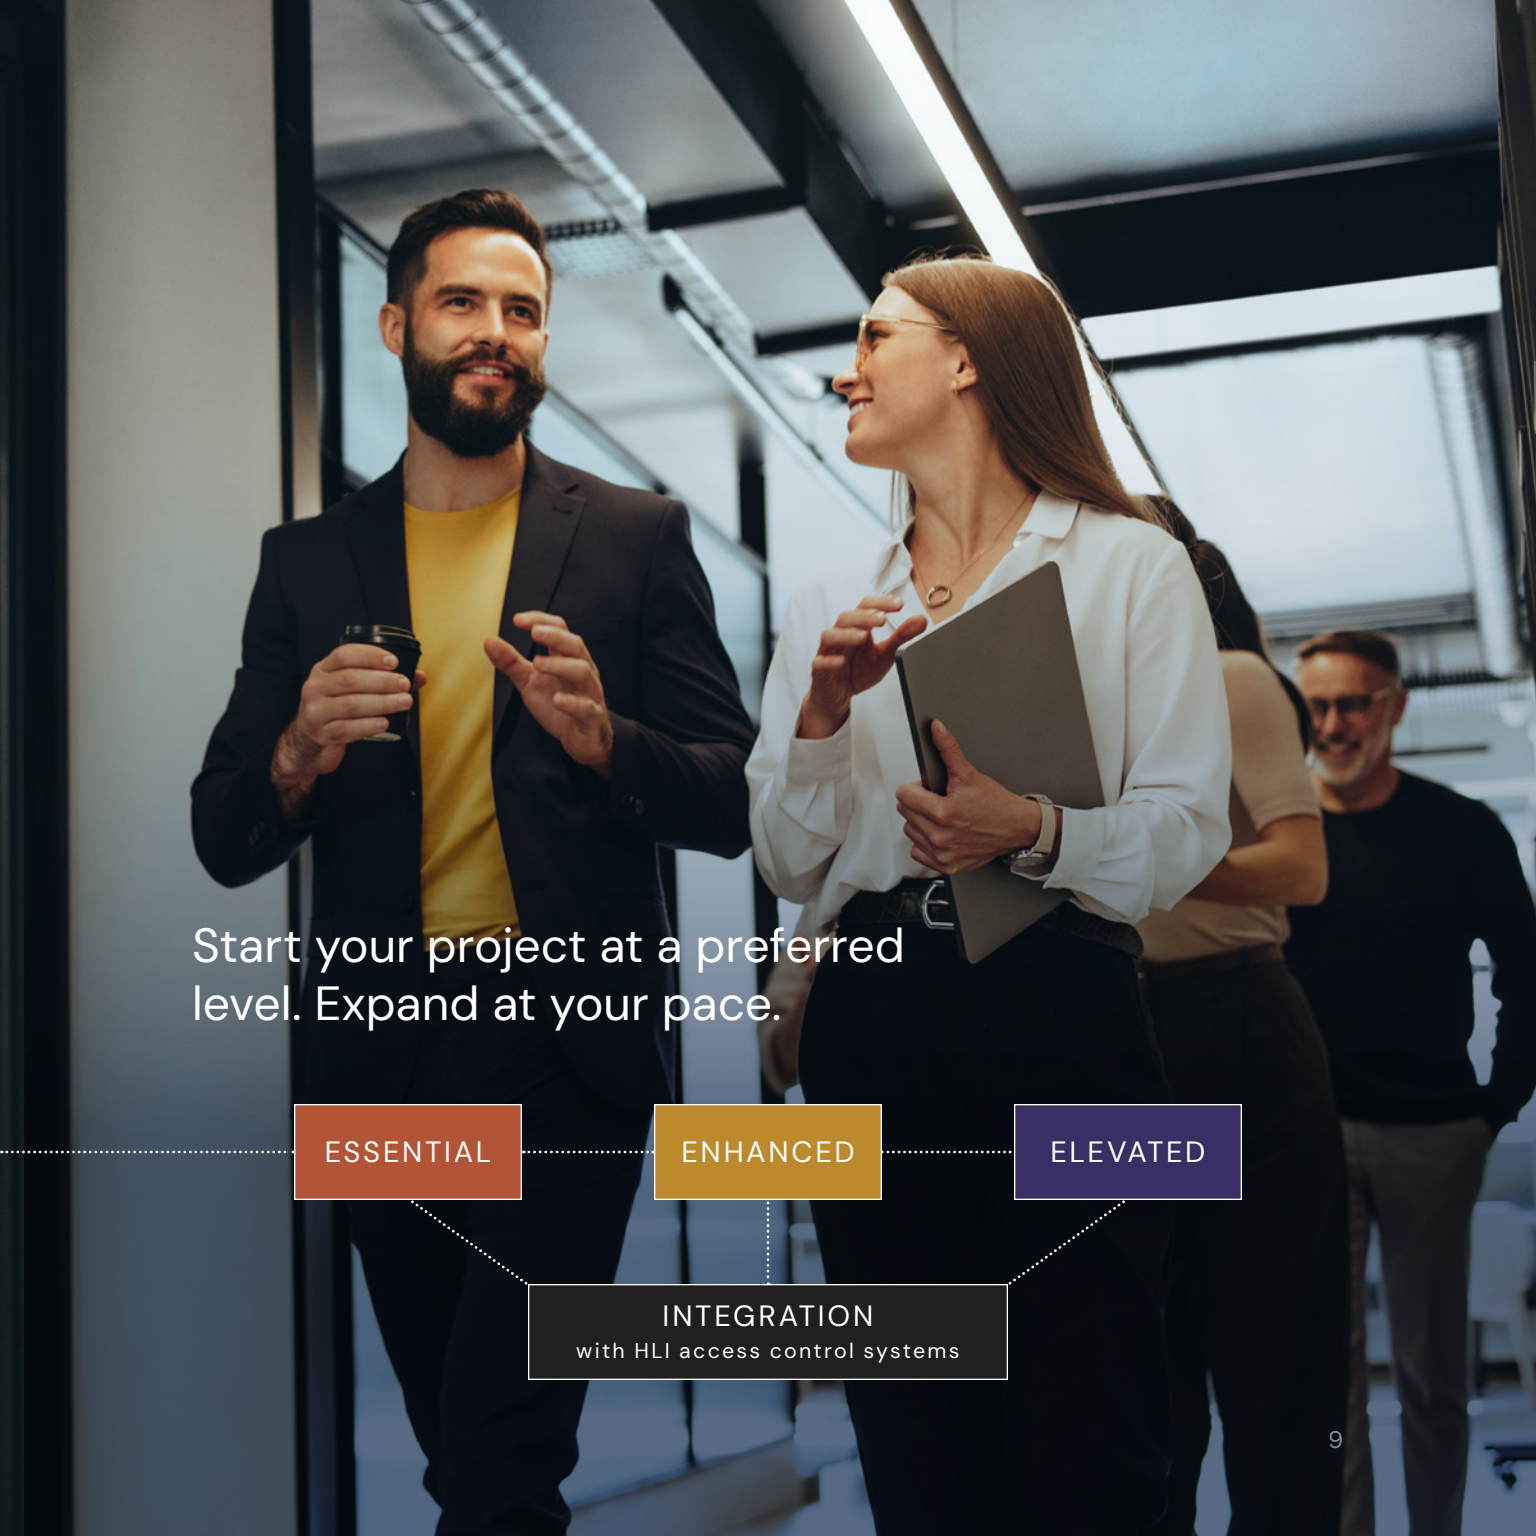

PUBLIC SECTOR

From transport hubs to financial and judicial institutions, we provide the highest level of protection for critical infrastructure across the world. This is why we are the preferred security solution provider for federal, state, and local governments.

Whether you're starting with a video intercom system for added security and convenience, incorporating access control features as your organisation grows, or looking to integrate all layers of your security, we have a solution tailored to your needs.

Our comprehensive range of video intercom solutions are designed to maximise flexibility and scalability without compromising convenience or ease of use.

Start your project at a preferred level. Expand at your pace.

Security Journey

ESSENTIAL SECURITY

ESSENTIAL SECURITY

Basics for Your Daily Living

The foundation of modern security begins with the ability to see, speak with, and unlock doors for visitors. This simple yet powerful layer of protection allows you to proactively identify and communicate with visitors before granting them entry.

Homes, small offices, and retail stores alike can benefit from this essential level of security, ensuring a safer and more convenient experience for everyone.

SAFETY

Verify visitors' identities before allowing them entry.

CONVENIENCE

Remotely answer and unlock doors for delivery drivers or trusted guests.

DETERRENCE

Deter potential intruders with the presence of a video intercom.

JV Series

- 1 video door station and 2 answering stations
- IP54 rated to withstand dust and water
- IK08 vandal resistance
- Corrosion-resistant
- Night-time LED
- 7" screen
- Picture memory
- Retrofit-friendly

JO Series

- 2 video door station and 2 answering stations
- Includes free mobile app for up to 8 devices
- IP54 rated to withstand dust and water
- IK08 vandal resistance
- Corrosion-resistant
- Night-time LED
- 7" touchscreen
- Video recording
- Retrofit-friendly

JP Series

- 4 doors stations and 8 answering stations
- Wide-angle camera with advanced light adjustments
- Auto image capture
- IK08 vandal resistance
- 7" touchscreen
- Audio indicators and T-Coil connection for accessibility
- Answer hands-free or with the included handset

Security Journey

A woman with long dark hair, wearing a blue uniform, is seated at a desk. She is holding a black telephone receiver to her ear with her left hand and pointing at a tablet with her right hand. The tablet displays a video call with a man in a green uniform. In the background, there is a white desk with a potted plant in a white ceramic pot, two small succulents in white pots, and a computer monitor displaying a blue interface. The scene is lit with warm, indoor lighting.

ENHANCED SECURITY

AIPHONE IX-DV

E N H A N C E D S E C U R I T Y

Fortified for Everyday Safety

The next level of security involves expanding communication and surveillance capabilities. Customised call routing guarantees visitors will receive a prompt response and that conversations across different areas are always quick and easy.

See a broader view of your surroundings by integrating with cameras and video management systems. This improves visibility and allows you to record calls and incidents, all contributing to a more secure environment.

COMMUNICATION

Unify communication across your entire building with the ability to immediately answer door station calls, transfer answered or incoming calls, and speak internally between rooms or offices.

AWARENESS

Improve your situational awareness with the ability to monitor any video intercom station at your discretion, providing a visual overview of your property.

RECORDING

Record and store video footage of all door calls, whether answered or missed, allowing you to review interactions in case of security incidents.

JP Series

- 4 doors stations and 8 answering stations
- Wide-angle camera with advanced light adjustment
- Auto image capture
- IK08 vandal resistance
- 7" touchscreen
- Audio indicators and T-Coil connection for accessibility
- Answer hands-free or with the included handset

IX | IXG Series

- Select the number of stations to grow with your needs
- IP65 rated to withstand dust and water
- IK08 vandal resistance
- Call transferring, paging, bell scheduling, and internal communication
- Unlock doors using answering stations, VoIP telephones, mobile devices, and PC software
- Issue temporary QR codes for visitor access
- SIP and ONVIF® compliant for integration with telephone and video management solutions

ELEVATED SECURITY

Modern Protection

A unified security ecosystem is essential for organisations with complex security needs. Integrating with leading technology partners streamlines security protocols and automates threat responses, such as triggering alarms or recording video. Advanced call routing not only ensures a smooth and secure visitor experience, but also strengthens internal communication.

Adding access control gives precise control over who enters specific areas and maximises safety while maintaining operational efficiency. With a powerful communication solution that seamlessly integrates into this ecosystem, your organization's security reaches unprecedented levels of sophistication.

INTEGRATION

Designed with open platforms in mind, we offer easy integration with technology partners like Integriti®, Genetec®, and Milestone®.

EMERGENCY

We provide a single security communication platform, offering emergency towers, wall boxes, and intercoms.

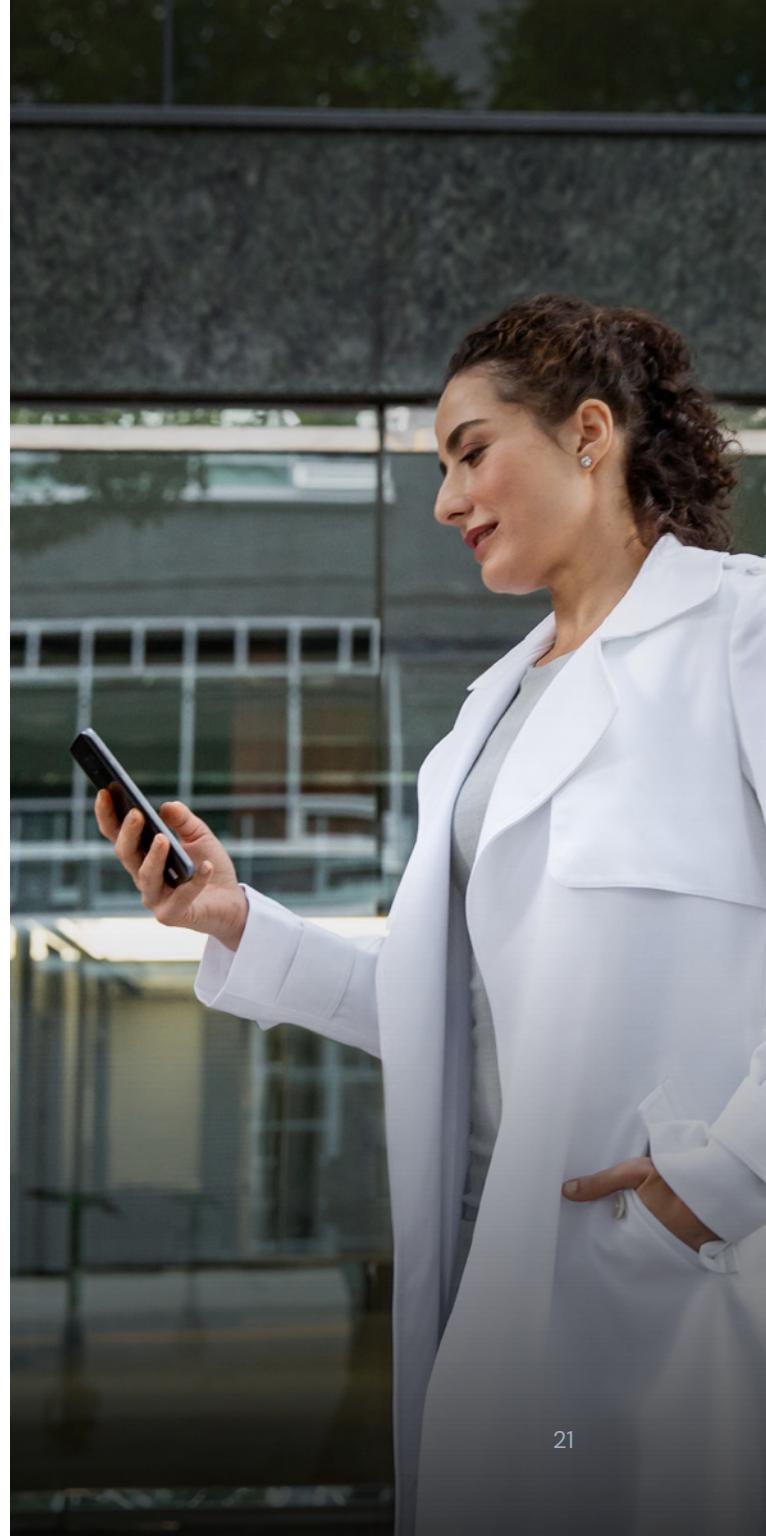

MOBILE

From video calls, to access control, to in-the-moment system management, our mobile app provide modern security solutions for today's requirements.

IX | IXG Series

- Unlimited number of door stations, emergency stations, answering stations, and sub-stations
- IP65 rated to withstand dust and water
- IK08 for vandal resistance
- Call transferring, paging, bell scheduling, and internal communication
- Unlock doors using answering stations, VoIP telephones, mobile devices, and PC software
- Issue temporary QR codes for visitor access
- SIP and ONVIF® compliant for integration with video management and telephone solutions

Designed for a wide range of applications, our hard-wired stations provide consistent, reliable communication with authorities in an emergency. We offer customisable towers in lightweight aluminium. These complement multiple layers of security from video surveillance to mass notification.

Our SIP compliant emergency stations make it easy to call an outside number and have the call prioritised as an emergency. The IX | IXG Series provides live video monitoring, allowing authorities to assess and respond to critical situations.

Emergency Series

- Integrates with all layers of security, from video management systems to access control
- SIP allows outgoing calls directly to a phone line or call centre
- Line Supervision and Device Check verify everything is connected and functioning
- On-board recording with microSD™ captures audio and video
- ONVIF® video streaming 24/7
- DDA-compliant wall-mount boxes, emergency towers, and emergency stations
